RunScanner is a simple tool to monitor and clean windows processes, registry and application. RunScanner

Features: - More than 20 working scanner for monitoring different types of programs and files. - Easy to use, no installation needed. - Robust database of 300+ thousands of malicious objects. - Use mobile and tablet computers with

running processes and more. -
Cleaner and easy to use. - Scan
the whole system in a couple of
seconds. - Protect the whole
system and work properly if
computer hibernate or suspend.
- Clean hard drive of
unnecessary information. -
Works on Windows 8, 7, Vista,
XP and earlier. Installation
Process: RunScanner uses a
clean and small interface to scan
the whole system for malicious
processes and files. It will detect

and remove processes that shouldn't run in the first place, and most of the time malware also doesn't have a program to hide itself. How to use RunScanner: You can use RunScanner without installation as it works on a portable basis and is easy to use and configure. You need to connect the tool to the internet through the USB interface, then connect your desktop or laptop to the internet, plug RunScanner into USB port,

select the location where you want to store the database, name of the database, switch the scan on, and press start button. You need to connect the tool to the internet through the USB interface, then connect your desktop or laptop to the internet, plug RunScanner into USB port, select the location where you want to store the database, name of the database, switch the scan on, and press start button. How to scan the system without

internet: RunScanner will prompt you to get online to save the log file. It will prompt you to get online to save the log file.

RunScanner privacy and

support: RunScanner is completely clean, doesn't collect any personal or private data and does not store any of them on your computer or online.

RunScanner is completely clean, doesn't collect any personal or private data and does not store any of them on your computer

or online. RunScanner Team and Updates: RunScanner is an independent project that has no affiliations with any other projects.
