The ceremonies and rituals make use of fasting, chanting, breathing techniques, bells,.Q: Rails: Where should i define model (Class) I have a model which has relation to the Model User and Block now the user has _many blocks and every block has one user and many are assigned to a user i have some others models like this: model/user.rb has_many :blocks model/block.rb belongs_to :user has_many :assignments belongs_to :blockable, polymorphic: true has_one :answer now i want the user to be able to set some rules to the block and that the block has some abilities but the abilities should be hidden and the logic itself should be in the model user so the problem is how should i create the model user and where i define the model (the controller) A: You can define the user model in the User model. The user model could include some methods like the ability to set user rules. Here is a sample User model class User 'Rule' has_many :assignments, :class_name => 'Assignment' end The ability definition goes here. class Ability include CanCan::Ability def initialize(user) ||= User.new # guest user user ||= User.new if user.is?(:admin) can :manage, :all end end end Here is a sample code for rule class Rule < f988f36e3a
